

COUNT ON THE

UNSTOPPABLE STAYING POWER

OF SUSPEND® POLYZONE®

Stop relying on microcap technology like Demand® CS and Cy-Kick® CS.

Suspend PolyZone

—VS—

Microcaps

Microcaps offer less staying power

Suspend®
POLYZONE®

UNSTOPPABLE STAYING POWER

Suspend PolyZone does what microcaps can't – it stays where it's sprayed for up to 90 days even in the toughest conditions.

- Proprietary polymer layer locks the AI in place and protects it from the elements
- Proven reduction in callback frequency, increasing customer satisfaction and retention
- Broad-spectrum pest control with fewer applications

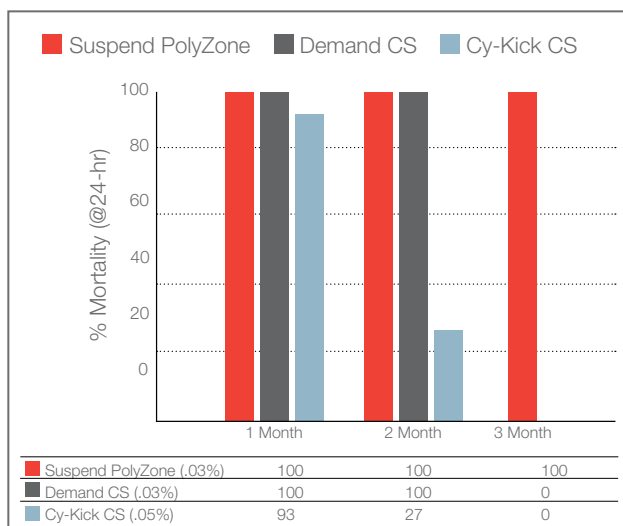

Suspend[®]
POLYZONE[®]

Suspend PolyZone is more than a microcap.

Here's what you get:

- **Up to 90 days of outdoor residual** – an average of 30% longer than microcaps

METHOD: Glazed tiles, treated tiles aged outdoors, 30-minute exposures of German cockroach to aged tiles, held in clean environment to monitor mortality through 24 hours. (Source: OE09NABYW-ENY1)

- **Protection from the elements** – like weather, precipitation, irrigation and mechanical abrasion

- **Indoor and outdoor application flexibility** – it won't damage paints, plastics, mattresses, furniture or other surfaces where water alone causes no damage, apply it as a spray or paint it on a surface
- **Broad-spectrum control** – including Spiders, Ants, Mosquitoes and Cockroaches

Suspend PolyZone keeps customer callbacks to a minimum, while increasing your customer satisfaction.

What pest management professionals are saying about Suspend PolyZone.

Since adopting Suspend PolyZone, our technician call-backs are down 37%.
– Brian Seitz, Seitz Bros. Termite & Pest Control, Pennsylvania

When I'm in the field with our technicians, I'll notice immediate results of the pests we're treating.
– Greg Bausch, American City Pest & Termite, California

Our clients deserve the benefit of having the 90-day residual... We're in the business of environmental pest management and using technology to our advantage, which is what our customers expect.
– Jason Carpenter, Environmental Pest Management, Ohio
