

The small block that yields big results.

- Best mini block for results
- Great tasting bait mice and rats love
- Versatile formulations for multiple situations
- Low cost-per-placement

Generation[®]

Rodenticide

Extremely palatable mini block, half the active ingredient — all in a compact size.

Mice and rats like the whole seeds and overall taste. You'll like the cost-per-placement savings and overall results.

Powerful—Half the concentration versus most other blocks.

Low Cost—20 gram mini block results in lower cost-per-placement.

Convenient—Mini blocks available in an easy-to-carry 4 lb. bag.*

Formulations—Available in mini blocks, pellet place packs or paraffinized pellets.

- Highly palatable mini block
- Smaller block size means less bait waste
- You can see the difference: Whole millet seeds in block engineered for natural seed preference of mice
- Mini blocks allow for secure horizontal or vertical placement in bait station
- Pellets are excellent for burrow baiting
- Convenient, easy-to-use baiting options: Mini blocks or pellets (bulk or place packs)
- Mini blocks available in a pail or 4 lb. resealable bag that keeps bait dry
- Food-grade grains combined with less wax and dye contribute to great taste
- Difethialone: Still the newest second-generation anticoagulant available
- Able to kill in a single night's feeding with no bait shyness – see results 4-5 days after placement
- Readily available anticoagulant antidote: Vitamin K₁
