

THE SECOND GREATEST FEAR? SNAKES.

Ophidiophobia, or fear of snakes, affects one-third of the population. You can help protect your customers from snakes and even help ease their fear.

Simply apply Snake Out® around the perimeter of the yard. Snakes “taste” the air with their tongues. Snake Out irritates their Jacobson’s Organ, which senses chemicals and pheromones picked up by the tongue. As a result, snakes are repelled and move away during normal foraging.

Remember, always read, understand and comply with the label. Jacobson's Organ illustration By Fred the Oyster via Wikimedia Commons under the terms of the GNU Free Documentation License.
