

Trebor® Triple Seal

TREBOR® TRIPLE SEAL

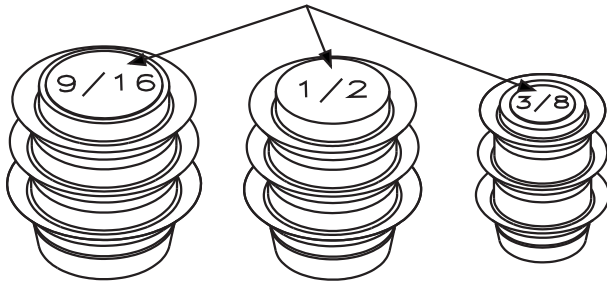

The most effective and easiest plug to install for termiticide applications.

A hollow core and three flexible lips allows this patented plug to conform to hole irregularities better than solid core plugs.

Available in three sizes

Hole size clearly marked on top to eliminate errors.

Trebor® Two-Way Triple Seal

The ultimate hole seal for termiticide injection holes in concrete, stone, terrazzo, tile and other materials.

Durable: Molded from linear low density polyethylene (LLDPE) and designed for years of dependable service.

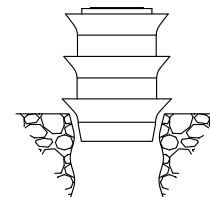

Versatile: Two-Way Triple Seals can be installed in several ways.

Effective: The "triple seal" ring design provides triple protection from vapor and liquid contamination.

Economical: Trebor plugs are manufactured from an extremely durable extrusion grade plastic.

AIRMATE #	B&G #	DESCRIPTION
4-375-504	45000375	3/8 Seal - 1 case (10 Buckets of 250 Seals)
4-500-504	45000500	1/2 Seal - 1 case (10 Buckets of 250 Seals)
4-562-505	45000562	9/16 Seal - 1 case (10 Buckets of 250 Seals)

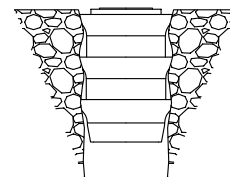

Installation Instructions for Trebor® Seals

1. Place pilot diameter in hole.

Level with Floor Surface

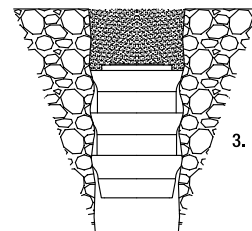

Ideal for under carpet, tile, inlaid floor, and quarter round moulding.

2. Lightly tap in until flush with rubber mallet or push in with shoe heel.

Below Floor Surface

Use when mortar cover is desired, uses minimal amount of mortar.

3. Tap to depth with peg, then add mortar cover.
